

RBI Fellowship Application Form

Students who have been admitted to one of the four schools participating in the RBI program (School of Chemical and Biomolecular Engineering; School of Materials Science; School of Mechanical Engineering; School of Chemistry and Biochemistry) and who are applying for RBI fellowship funding must file the form below with a faculty member who has been awarded a fellowship. Awards for academic year 2017-18 will be announced March 15, 2017, on this website. The application should be accompanied by a copy of the original application for admission to the student's home school. The faculty member then forwards the form and application to Dr. Norman Marsolan, Executive Director – Renewable Bioproducts Institute. A PSE minor is required for RBI Fellowship funding, and may also be pursued independent of such funding.

Student Statement of Interest

Each student candidate should address each question with a one- or two-paragraph response.

- How is your project relevant to the forest products industry? Please frame your response in context of the Agenda 2020 Forest Products Industry roadmaps, 2016, summarized here:
<http://www.agenda2020.org/technology-roadmaps.html>
- How will your results impact the forest products industry, e.g. in terms of products, processes, sustainability and environmental impact?
- How will involvement in the PSE program shape your career objectives?
